

Ahmed Hussein Ali Abdelsalam Hussein

Menofia, Egypt | 01099846934 | ahmedhussein12215@gmail.com | LinkedIn: [Ahmed Hussein](#) | GitHub: [A7med668](#)

Professional Summary

Data Science undergraduate with a 3.63 GPA and hands-on experience building AI applications across RAG, LLMs, NLP, computer vision, OCR, financial analytics, and cybersecurity. Skilled in Python, Streamlit, TensorFlow, PyTorch, LangChain, Hugging Face, FAISS, and data visualization, with a practical portfolio of end-to-end AI solutions.

Education

Faculty of Artificial Intelligence, Menofia University
Major: Data Science - Fourth-Year Student | GPA: 3.63

2022 - 2026
Menofia, Egypt

Technical Foundation & Math

- | | | | |
|-------------------------|----------------------------------|-------------------------|-------------------------------|
| - Data Science | - Machine Learning | - Deep Learning | - Natural Language Processing |
| - Computer Vision | - Retrieval-Augmented Generation | - Large Language Models | - Data Analysis |
| - Business Intelligence | - Cybersecurity Analytics | - Financial Analytics | - OCR & Document AI |

Projects

LangGraph Multi-Agent Mobile Security Assistant | Python, LangGraph, Streamlit, Ollama, LangChain, Qdrant, FAISS, LangSmith | [Repo](#)

- Built a LangGraph multi-agent mobile security assistant with Guard, Cache, Router, Query Optimizer, Memory, Database, Retriever, Web Search, and Response agents.
- Integrated MASVS lookup, Qdrant RAG, FAISS long-term memory, Tavily/DuckDuckGo fallback, bilingual Streamlit UI, and LangSmith tracing for grounded security answers.

AI-Powered Financial Advisory Platform | Python, Streamlit, Hugging Face API, Plotly, LangChain, Pydantic, SQLite, Pandas | [Repo](#)

- Developed an AI financial advisory platform that analyzes financial data and generates personalized savings, investment, and debt-management recommendations.
- Built a Streamlit dashboard with AI insights, financial health scoring, multilingual support, real-time analytics, and SQLite-based history tracking.

Document Q&A System (RAG Project) | Python, Streamlit, FAISS, LangChain, Sentence-Transformers, Google Gemini API, PyPDF2 | [Repo](#)

- Implemented a RAG pipeline for PDF extraction, intelligent chunking, embeddings, FAISS semantic search, and Gemini-based answer generation.
- Delivered a real-time document analysis chat app that returns context-aware answers from PDF files using natural-language queries.

OllamaMed - Medical Report Summarizer | Python, Streamlit, Ollama, Llama 3, PyPDF2, pdf2image, pytesseract, OpenCV, NumPy | [Repo](#)

- Built a privacy-focused pipeline that processes medical PDFs and images locally using OCR and a locally deployed Llama 3 model.
- Created an offline application that summarizes clinical reports, highlights key insights, and explains complex medical terminology.

Eco-Guard: Plant Disease AI | Python, Streamlit, TensorFlow, Keras, OpenCV, PIL, Plotly, Matplotlib | [Repo](#)

- Designed a CNN-based computer vision pipeline to detect plant leaf diseases and estimate infection severity from uploaded images.
- Implemented heatmaps, severity analytics, treatment recommendations, export features, and an interactive plant-health dashboard.

Threat Hunting Assistant (RAG + Cybersecurity) | Python, Streamlit, Llama 3, RAG, ChromaDB, MITRE ATT&CK | [Repo](#)

- Developed an AI-based threat analysis assistant that uses LLMs and RAG to process security logs, artifacts, and investigation data.
- Mapped suspicious behavior to MITRE ATT&CK techniques and generated automated multi-format threat reports for cybersecurity analysis.

Additional Projects: [YouTube Video Summarizer](#) (BART-large-CNN, PyTorch, Streamlit), [Sentiment Classification](#) (TensorFlow, scikit-learn, TextBlob, WordCloud).

Experience

AI, Data Science & Business Intelligence Internships | NTI, ITI, Tips Hindawy, Cognorise Infotech, Prodigy Infotech, Eyooth

- Completed professional training in data analysis, business intelligence, machine learning, data science, LLM applications, and applied analytics workflows.
- Applied Python, Streamlit, NLP, deep learning, visualization, OCR, RAG, and deployment techniques across practical AI solutions.

Training Programs: NTI - Data Analysis Skills for the Freelance Professional; ITI - Business Intelligence Development; LLM Internship at Tips Hindawy; Data Science Internship at Cognorise Infotech; Machine Learning Internship at Prodigy Infotech; Eyooth Data Analytics Bootcamp

Technical Skills

Languages: Python, SQL

AI/ML: Machine Learning, Deep Learning, NLP, Computer Vision, RAG, LLMs, Agentic AI, OCR, Sentiment Analysis

Frameworks/Libraries: Streamlit, LangGraph, TensorFlow, Keras, PyTorch, scikit-learn, LangChain, Hugging Face Transformers, FAISS, Sentence-Transformers, OpenCV, Pandas, NumPy, Plotly, Matplotlib, Pydantic

Tools/APIs: Google Gemini API, Ollama, Llama 3, BART-large-CNN, Qdrant, ChromaDB, SQLite, LangSmith, Tavily/DuckDuckGo, Git/GitHub, Ngrok

Cybersecurity: MASVS, Mobile Security, MITRE ATT&CK, Androguard, Scapy

Soft Skills: Analytical thinking, problem solving, research, communication, adaptability, continuous learning
